### Farm Maintenance Individual

Margaux Farm is a growing multi-service Thoroughbred farm, offering foaling, starting and training, layup and rehab to meet virtually every racing owner's needs away from the racetrack. Margaux is now seeking an individual to join four other workers in its maintenance department.

The ideal candidate will be an organized self-starter with experience in horse farm maintenance including tractors, hay tools, skid steers, telehandlers and other heavy machinery. In addition to conventional farm equipment operation, this position will also involve precision track maintenance procedures for which Margaux will provide all relevant training.

While this position will initially involve being part of a team of maintenance workers, there is a clear path to an eventual maintenance manager role for an individual with the right balance of technical and people skills.

This is a year-round, full-time position with compensation commensurate with experience. Benefits include individual and family health insurance, company paid life insurance and matching 401k.

Please send applications to the attention of Richard Budge, General Manager by email to [info@margauxfarm.com](mailto:info@margauxfarm.com) or by mail to Margaux Farm, PO Box 4220, Midway, KY 40347.
