Job Title: Track-Side Sensor Technician

StrideSAFE is a company that uses sensors placed in the saddlecloth of a thoroughbred racehorse to help determine their likelihood of catastrophic injury based on the stride of the racehorse. We are looking for a new full-time employee to operate our sensor systems at various Kentucky tracks as well as train staff at additional tracks.

Job Duties & Responsibilities:

- Operate StrideSAFE system during all racing days at Churchill Downs, Keeneland, Turfway Park, and Ellis Park.
- Manage all StrideSAFE equipment and coordinate with technical staff for maintenance.
- Log all hardware and software issues through the appropriate communication channels and work with technical staff to troubleshoot any issues.
- Operate StrideSAFE system for morning workouts as requested.
- Travel within the U.S. to train new staff on operation of the system.
- Potentially operate the system at other racetracks around the country on a temporary basis.
- Other tasks as requested by StrideSAFE management.

Job Qualifications:

- Experience working with thoroughbred racehorses.
- Track experience preferred.
- Good communication skills.
- Good computer proficiency.
- Independent worker.
